

WHERE?

Organizations - Improve productivity, streamline processes, and achieve end-to-end process clarity with PNMsoft's leading solutions and products.

VARs (Value Added Resellers) - PNMsoft's solutions are highly sellable, guaranteeing a greater competitive edge, faster time-to-solution, assured end-user satisfaction, and ongoing ROI.

OEMs (Original Equipment Manufacturers) - Sequence will BPMize your product, leveraging its capabilities by providing flexibility, scalability, and the ability to integrate and monitor new and existing processes.

PNMsoft's customers and partners cross boundaries and industries throughout the globe:

WHAT?

Technology

PNMsoft's Sequence is a rapid web-based BPM application generator that provides the fastest time-to-solution, the highest ROI, and optimal extensions for external systems and applications. Utilizing its inherent flexibility, Sequence integrates with best-of-breed 3rd party products, offering customers the most advanced solution available. Compatible with any web environment, Sequence supports establishing, operating, managing, and monitoring BPM (Business Process Management) applications in the simplest, most efficient manner.

Requiring no programming or database expertise, this wizard-driven platform provides the only complete BPM tool for the business user.

Vertical & Horizontal Solutions

PNMsoft offers total BPM solutions for various industries, including CRM systems, Finance & Purchasing, Human Resources, Quality Assurance, R&D, Sales & Marketing, and more.

Consultation

PNMsoft is committed to sharing its extensive experience with both customers and business partners, offering advanced consulting services at every stage of developing a project.

WHY?

Web Based & Cutting Edge Technology - PNMsoft systems offer customers the most advanced BPM solutions on the market, enabling IT and business users to establish quick and efficient process-based applications.

No Programming, No Coding - BPM solutions with a business-user orientation ensure rapid implementation and operation, with minimal training and programming.

Microsoft Integration & Support - PNMsoft's product is tightly integrated with BizTalk & Office System, complementing existing capabilities and enhancing performance.

Integration - Easy and rapid integration with all existing systems and applications - present and future.

Flexibility - Offering solutions for vendors and end-users, PNMsoft's systems are scalable, flexible, and designed for rapid development and integration.

Dynamic Conversion - Fast and dynamic conversion of static/task-oriented systems into process-oriented systems

Web Services & SOA - All solutions and platforms are developed according to the latest standards, enabling dynamic integration of local and external applications

TCO (Total Cost of Ownership) - Because of the platform's flexibility, its no-coding no-training approach, and the built-in integration & support for Microsoft products, the TCO for Panam solutions is consistently low: from purchasing, through implementation and integration, to ongoing maintenance and support.
